With the Topaq® Advanced Temperature Analysis System, statistical data and detailed digital visuals can be revealed from Thermex® temperature indicating sensor paper.

Topaq® enables a wealth of statistical information and high resolution visuals to be revealed from Thermex® - greatly enhancing the ability of the sensor film to define temperature distribution. Key statistics like average temperature and total square inches of contact can be determined with ±4% accuracy using Topaq®'s advanced analysis capabilities. Topaq® can also render histograms and population statistics on user-defined regions of interest.

**FEATURES**

- 2D pseudocolor display of temperature distribution
- 3D topographical view
- Graphical display of temperature data
- Graphical view of data along a user-defined line
