Fujifilm Prescale® is a unique, affordable and easy to use tool that reveals the distribution and magnitude of pressure between any two contacting or mating surfaces.

**Application: Heat Seal**

**4 Easy Steps**

1. Heat seal pressure measurement film comes on a roll
2. Place the heat seal impression film between any two sealing platens that come in contact
3. Fujifilm Prescale® heat seal impression film captures a permanent image of pressure distribution and magnitude
4. The color Fujifilm Prescale® heat seal impression film turns indicates the precise PSI level

**Quickly developed**, Fujifilm Prescale® dramatically reveals a complete pressure “map”

- **Colorization applied with the Topaq® optical analysis system**

Fujifilm Prescale® is a mylar based film that contains a layer of tiny microcapsules. The application of force upon the film causes the microcapsules to rupture, producing an instantaneous and permanent high resolution “topographical” image of pressure variation across the contact area.

Simply place Fujifilm Prescale® pressure indicating sensor film between any two surfaces that touch, mate or impact. Apply pressure, remove it and immediately the film reveals the pressure distribution profile that occurred between the two surfaces. Conceptually similar to Litmus paper, the color intensity of Fujifilm Prescale® is directly related to the amount of pressure applied to it. The greater the pressure, the more intense the color.

Fujifilm Prescale® is extremely thin (4 to 8 mils) which enables it to conform to curved surfaces. It is ideal for invasive intolerant environments and tight spaces not accessible to conventional electronic transducers.
Tactile Pressure Indicating Sensor Film
Accurate, Cost-effective, Easy to Employ Pressure Mapping Technology

Have you ever needed to evaluate pressure or force between two touching or mating surfaces? Previously, your only alternatives were strain gauges and load cells, that are both time consuming and difficult to interface. Now with the advent of our disposable one-time use pressure film, Fujifilm Prescale®, evaluating surface contact pressure distribution and magnitude is accurate, quick and highly economical.

INDUSTRY APPLICATIONS

AEROSPACE
- Composite Layups, Material Testing, Bolted Joints

AUTOMOTIVE
- Gasketing, Impacts, Fuel Cell Stacking, Clutches, Brakes, Tire Tread

ELECTRONICS
- Heat Sinks, LCD Bonding, PCB Lamination, Wafer Bonding/Polishing

MEDICAL
- Clamping, Gait Analysis, Ergonomics, Orthotics and Prosthetics

PACKAGING
- Heat Sealing, Converting

PLASTICS
- Lamination Press, Die Extrusion Injection Molding, Stamping

PRINTING/PAPERMAKING
- Nip Impressions
